

Celso Roberto Espinoza Arce

Technical Lead & Backend Development

Lima, Peru | espinoza.arce13@gmail.com | +51 995 742 585 | [linkedin.com/in/celso-espinoza-arce-4b78b8b7](https://www.linkedin.com/in/celso-espinoza-arce-4b78b8b7)

SUMMARY

Backend Tech Lead with 8+ years of experience building and scaling backend systems, most recently leading event-driven and plugin-based architectures at Yape (BCP) on NestJS/GraphQL. Strong background in microservices, third-party integrations, and cross-functional technical leadership. Currently pursuing a BSc in Computer Science (University of London) alongside full-time work.

EXPERIENCE

Technical Lead — Yape (BCP)

Lima, Peru | January 2024 – August 2026

- Designed an event-driven workflow for the promotions catalogue that automated stock-depletion handling.
- Led the migration of a NestJS/GraphQL BFF to a plugin-based architecture, improving modularity across the product.
- Owned the partner-facing integration for Yape Buses, built on an internal framework for embedding external web experiences within Yape, ensuring secure data handling and robust technical documentation.

Backend Developer — Yape (BCP)

Lima, Peru | June 2023 – January 2024

- Developed a location-based promotions filter connecting users with nearby stores via a headless CMS.
- Maintained and enhanced the promotions product using NestJS, GraphQL, and PostgreSQL backend services.
- Collaborated with cross-functional teams to ensure seamless integration and functionality of the promotions system.

Backend Developer — Lean Tech

Remote | May 2022 – June 2023

- Contributed to backend application development and supported new-hire onboarding on internal standards.
- Improved project architecture to meet scalability requirements and modern engineering standards.

Backend Developer — Rappi

Peru · Fraud-Ops Team | April 2021 – May 2022

- Maintained and extended the Fraud vertical's web backoffice platform on a microservices architecture using Kotlin, Vert.x, RxJava, PostgreSQL, and Kafka, with AWS SQS and DynamoDB.
- Ensured code quality with Mockito and SonarQube; ran CI/CD with Jenkins and monitored via SignalFx and LogDNA.

Product Development Team Leader — APPRUNN

Miraflores, Lima, Peru | October 2019 – March 2021

- Led planning and execution of product development activities across backend and mobile.
- Built backend (Node.js, Hapi.js, MySQL, Docker, AWS) and mobile (Java, Kotlin, Retrofit, Firebase) features.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Kotlin, Java
Backend / API	Node.js, GraphQL, Microservices, Event-Driven Architecture, Clean Architecture
Data & Messaging	PostgreSQL, MySQL, Redis, Apache Kafka, DynamoDB
Cloud & DevOps	AWS, Azure Blob Storage, Docker, Jenkins, GitHub Actions, CI/CD
Quality & Monitoring	SonarQube, Datadog, Dynatrace, SignalFx, LogDNA, Grafana

EDUCATION

BSc, Computer Science — University of London

In Progress · Started April 2026, expected 2030

AWS Solutions Architect Associate — BSG Institute (2020)

Development Program — Platzi (2017 - 2018)
